2. Claims 3-4, 9-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/13/2004.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rose et al (U. S. Pat. 5,967,156).

Rose et al show a substrate processing apparatus with a first gas discharge element 80 and a second gas discharging element 82. Both elements spray gases to the substrate at the same region 17 of the substrate 52.

5. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patent publication No. 11-233481.

The Japanese publication shows a substrate processing apparatus with a first gas discharge element 4, a second gas discharging element 5 and a horizontal nozzle arm 3 for

Art Unit: 3749

moving the elements. Both elements 4, 5 spray gases to the substrate at the same region of the substrate 2.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rose et al (U. S. Pat. 5,967,156).

The substrate processing apparatus of Rose et al. as above includes all that is recited in claim 2 except for the gas flow rate. To adjust the flow rate of the first and second element is deemed to be an obvious matter of operation in adjustment in order to obtain optimal results.

9. Claims 2 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent publication No. 11-233481.

Art Unit: 3749

The substrate processing apparatus of JP Pub. 11-233481 as above includes all that is recited in claims 2, 6-8 except for the gas flow rate. To adjust the flow rate of the first and second element is deemed to be an obvious matter of operation in adjustment in order to obtain optimal results.
